Winner OrluVictor

Full-Stack & Backend Engineer | Cloud Infrastructure & DevOps | SaaS Products
winnerbrown9@gmail.com | +234 814 231 0497 | buildwithwinner.name.ng | Remote / Nigeria

PROFESSIONAL SUMMARY

Full-Stack and Backend Engineer with 5+ years building software, shipping and maintaining production-grade web applications across fintech, SaaS, and education domains. Strong command of Python/Django, Node.js, React/Next.js, and PostgreSQL, paired with hands-on cloud and DevOps experience on AWS (EC2, RDS, S3) with Docker, Nginx, Gunicorn, and CI/CD pipelines. Comfortable owning systems end to end, from database schema design and API architecture through to deployment, monitoring, and release automation.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, Node.js, Express.js, FastAPI, Go, RESTful API design, JWT authentication, WebSockets, background task queues (Redis/Celery)

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Context API, React Query, React Native (Expo)

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Redis: schema design, relational modeling, query optimization, migrations

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Nginx, Gunicorn, CI/CD pipelines, Vercel, environment management, SSL/TLS configuration, automated deployment scripts

Integrations & Tools: Flutterwave, Paystack, Cloudinary, Supabase Auth, Stripe, third-party REST APIs, Git, Linux CLI, Figma

AI & Automation: Anthropic Claude API, OpenAI API, LangChain, prompt engineering, agentic workflow design, used to ship production features in live products

WORK EXPERIENCE

Software Engineer | Metricoid (Full-Time) Jul 2026 - Present

- Built a Next.js superadmin portal on a shared Prisma schema across a multi-repo setup.
- Designed a data access layer that insulates the admin portal from schema changes made by other teams.
- Set up CI/CD with Bitbucket Pipelines, automating deploys to a UAT server with PM2 and deploy scripts.

Founder & Mentor | BuildWithWinner (buildwithwinner.name.ng) Apr 2026 - Present

- Run a coding school that mentors developers from zero to their first deployed application.
- Currently mentoring a developer on a 6-month contract covering React/Next.js, Node.js, FastAPI, VPS deployment, and CI/CD.

Full-Stack Developer | Career On Track (Contract) Oct 2025 - May 2026

- Architected and shipped a resume analysis feature using LLM APIs and advanced prompt engineering, turning raw job descriptions and resume text into structured, personalized career feedback at scale.
- Built and secured RESTful APIs with role-based access control (RBAC) and JWT authentication, serving a live user base on a Next.js + Supabase stack.
- Designed multi-step backend workflows that extract structured data from unstructured text, score candidates, and generate tailored output autonomously.
- Managed CI/CD pipelines and Vercel deployments, maintaining 99%+ production uptime with zero-downtime release cycles.

Founder & Full-Stack Engineer | QuickCarts (acquired, now siiqo.com) Feb 2024 - Aug 2026

- Designed and shipped a multi-tenant SaaS e-commerce platform: React frontend, Django REST backend, PostgreSQL on AWS RDS, load-balanced on EC2 with Nginx and Gunicorn.
- Architected isolated data models per tenant, escrow-based payment processing via Flutterwave, and automated S3 backup pipelines.
- Managed full SSL configuration, wildcard domain routing, Cloudinary media integration, and environment secrets management across staging and production.
- Handled all DevOps independently: server provisioning, deploy scripts, process management with Gunicorn/systemd, and Nginx reverse proxy configuration.
- Platform was acquired in August 2026 and rebranded as siiqo.com.

Web Developer & IT Support | Serverlink Jan 2025 - Jul 2025

- Built a full-featured School Management System handling student records, attendance tracking, and automated reporting across multiple client institutions.
- Developed an Inventory Management System with real-time stock tracking, purchase order workflows, and dashboard analytics, reducing manual overhead by 60%.
- Engineered MailRu, a CRM and user management platform integrating email workflows and customer data pipelines.
- Owned client relationships from requirements gathering through delivery, iterating rapidly on feedback across all active projects.

IT Support Specialist | Rivers State ICT Department 2022 - 2023

- Designed and launched the Rivers State Ministry of Agriculture website, improving public access to government services.
- Maintained ICT infrastructure including networking equipment, workstations, and CCTV systems across government facilities.

PROJECTS

Quick Carts (acquired and rebranded to siiqo.com)

Django, React, PostgreSQL, AWS EC2/RDS/S3, Nginx, Docker, Flutterwave

- Multi-tenant SaaS e-commerce platform with isolated store environments, escrow payments, vendor dashboards, and automated media handling via Cloudinary.
- Full DevOps ownership: EC2 provisioning, Gunicorn + Nginx setup, SSL via Certbot, deploy automation with bash scripts, and RDS migrations.
- Flutterwave integration with webhook handling, escrow release logic, and transaction logging.

Career On Track

Next.js, React, TypeScript, Supabase

- AI tool for job guidance and career growth, with LLM-powered resume analysis and structured career feedback.
- RBAC and JWT-secured REST APIs with CI/CD and zero-downtime Vercel deployments.

Ani

FastAPI, Pyrogram, Supabase

- Strategic AI agent with automated workflows and Supabase as the data layer.

Mindful Canva

Next.js, TypeScript, Supabase

- Lightweight note-taking app, a clean Next.js and Supabase implementation focused on UX simplicity.

EDUCATION

B.Sc. Computer Science | Ignatius Ajuru University of Education 2020 - 2025

- Algorithms, data structures, software engineering principles, and systems design.

CERTIFICATIONS

- Google AI Essentials, Google
- AWS AI Practitioner, Amazon Web Services
- LangChain for LLM Application Development, DeepLearning.AI
- Backend Web Development, Python & Django, Code Camp (2022)
